

## **DETAILED ACTION**

### ***Double Patenting***

Applicant is advised that should claims 14-19 be found allowable, claims 2-7 will be objected to under 37 CFR 1.75 as being a substantial duplicate thereof. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 13 is rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification, as originally filed, fails to provide support for the limitation of "supplementally thermally annealing the semiconductor substrate without forming a gate dielectric layer" since the supplemental thermal anneal will inherently produce another gate dielectric since it is equivalent to the twice thermally oxidized substrate of the prior art.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2, 7-8, 12, 14, and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by Admitted prior art.

The rejection is maintained as stated in paper #4 mailed 11-13-02 for the reasons of record.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3-6, 9-11, 13, and 15-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Admitted prior art.

The rejection is maintained as stated in paper #4 mailed 11-13-02 for the reasons of record.

### ***Response to Arguments***

Applicant's arguments filed 5-23-03 have been fully considered but they are not persuasive. Applicant argues that the double patenting rejection is improper. However, a careful examination of claims 14-19 will reveal that the double patenting rejection is proper because all of these claims depend from independent claim 1 and not independent claim 13. Concerning the rejection under 35 USC 112, first paragraph, applicant recites for support the portion at paragraph 0056 of the specification. However, this portion of the specification does not overcome the rejection because this annealing does not "compensate for forming thereupon the gate dielectric layers having less than the corresponding maximum numbered plurality of differing thicknesses" as required by independent claim 13. With respect to the prior art rejections under 35 USC 102 and 103, the examiner again respectfully submits that the claim has been interpreted in accordance with its broadest reasonable interpretation and such rejections are proper.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the
